Dear Residents,

Waste Management and especially its hard-working front-line employees – are working around the clock to ensure that they can continue to serve our residents and communities safely and with the least disruption reasonably possible in the face of the many challenges created by the COVID-19 virus. As Waste Management works earnestly to continue to provide collection and processing services to our community, the health and safety of their employees, customers and communities are their highest priority.

Because of the COVID 19 situation disruptions may be inevitable. At this time, no one can reliably predict the length of this event or how long potential service disruptions may last.

One example of change in service is as of **Monday, March 30, 2020, Waste Management is temporarily suspending the performance of the following services, which are non-essential during this period of emergency:**

- **Bulk Collection – furniture, carpet, mattresses, appliances, etc.**
- **Spring and bulk clean-ups**

When the Declarations of Emergency and social distancing recommendations have been eased and Waste Management's work force returns to pre-pandemic levels, these services will be restarted. They have been a part of this community for many years and know that together we can be resilient. Thank you for your patience during this crucial time.

Sincerely,

Mayor Paul D. Peterla
